

YANMAR B7-6

£POA

Ultra-tight turning, exceptional flexibility and unmatched compactness make this machine the right choice for densely populated areas and restricted urban sites. A unique three-piece boom offers the best dumping and digging heights in its class, together with exceptional stability. The powerful 53.5 kW TNV engine comes with electronic controls and offers exceptional performance and fuel economy. Operators also benefit from a spacious, ergonomically designed cabin, with many luxury touches fitted as standard.
