

YANMAR SV100-2

£POA

A winning blend of technology and innovation, the SV100-2 offers the performance of a large excavator while maintaining the benefits of a compact excavator. Designed to work effectively on a wide variety of sites, it combines compactness, power, versatility, comfort and reliability. The powerful engine comes with an electronic control unit, while improved hydraulics deliver ultra-smooth performance. There are also numerous standard features to make life easier for the operator, as well as simple to maintain.
