

# YANMAR ViO10-2A

## £POA

For superb manoeuvrability and performance in difficult environments, opt for the ViO10-2A. When the undercarriage is extended it becomes a zero-tail-swing machine, and when retracted, even highly confined environments become accessible. Longer tracks increase stability and smoothness, while an extendable folding blade adds to manoeuvrability. It also wins out on performance, thanks to the powerful engine and advanced hydraulic system. Easy to operate, thoughtful design ensures that maintenance is refreshingly straightforward.
