

YANMAR ViO26-6

£POA

This true zero tail swing machine allows safe rotation of the upper frame to maximise safety and productivity in restricted urban environments. Characterised by exceptional lifting and performance capabilities thanks to advanced hydraulics, the ViO26-6 is also a pleasure to use because of its ergonomic design, with Yanmar Full Protect to safeguard operators and those nearby. Even with attachments, total transport weight comes in at well under 3.5 tonnes, making it easy to transport by trailer.
