

YANMAR ViO82

£POA

Redefining performance in a midi excavator of this size, the ViO82 delivers maximum stability and exceptional lifting strength, even in confined urban work environments. The powerful and environmentally friendly engine comes with an electronic control unit, while the new-generation ViPPS2i® hydraulic system ensures smooth and precise operation. A large, comfortable cabin includes many ergonomic touches to minimise fatigue and maximise productivity, and there's straightforward access to working components for easy maintenance and servicing.
